

EduGenie: Google Gemini Powered Learning Assistant

3. Project Design Phase Phase

Purpose: Design the overall structure of EduGenie and define how its modules and technologies work together.

Phase Activities

- FastAPI is designed as the backend application layer with a simple HTML/CSS frontend.
- The project is organized into `main.py`, `explanation_module.py`, `qna.py`, `quiz_module.py`, `summary_module.py`, `learning_path.py`, `templates/index.html`, `static/style.css`, and `requirements.txt`.
- RESTful endpoints are defined for `/qa`, `/explain`, `/quiz`, `/summarize`, and `/learn/recommendations`.
- Each endpoint is connected to its respective module logic.

Project Focus: This phase is organized from the supplied EduGenie project document while retaining the requested phase name.
