

EduGenie: Google Gemini Powered Learning Assistant

1. Brainstorming & Ideation Phase

Purpose: Identify the learning problem and develop the core idea for an AI-powered educational assistant.

Phase Activities

- Students may need quick answers, simple explanations, summaries, quizzes, and structured learning guidance.
- EduGenie was proposed as a lightweight AI-powered educational assistant to simplify learning through generative AI.
- Core ideas: question answering, concept explanation, quiz generation, summarization, and personalized learning recommendations.
- Use cases include asking factual questions, generating a quiz on a topic such as the Pythagoras Theorem, and creating a beginner-to-advanced SQL learning path.

Project Focus: This phase is organized from the supplied EduGenie project document while retaining the requested phase name.
