

EduGenie: Google Gemini Powered Learning Assistant

6. Project Testing Phase

Purpose: Check whether the developed features operate as expected and handle errors appropriately.

Phase Activities

- Test asking a question and verify that an answer is returned.
- Test topic explanation and verify simplified educational content.
- Test quiz generation and verify questions and options.
- Test summarization and verify that core information is retained.
- Test personalized learning recommendations.
- Quiz generation cleans Markdown code blocks before JSON parsing and reports errors when generation or parsing fails.
- Learning-path responses are checked for invalid or incomplete API responses.
- Run the application locally with Uvicorn and perform functional checks.

Project Focus: This phase is organized from the supplied EduGenie project document while retaining the requested phase name.
